Uploading files from your device

You can upload files from the Discover tab. It's important to not upload any content you don't want becoming public such as personally identifying documents.

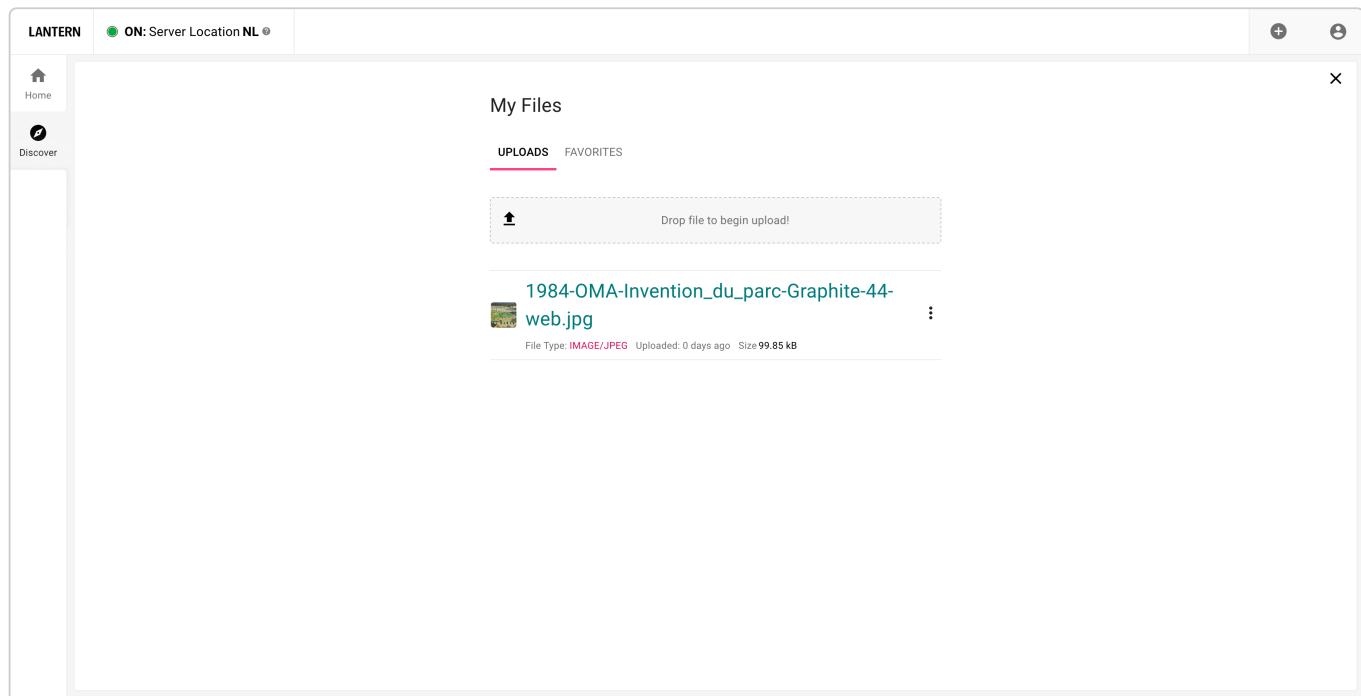

Drag and drop files in the upload area, then confirm that you have read the Discovery terms.

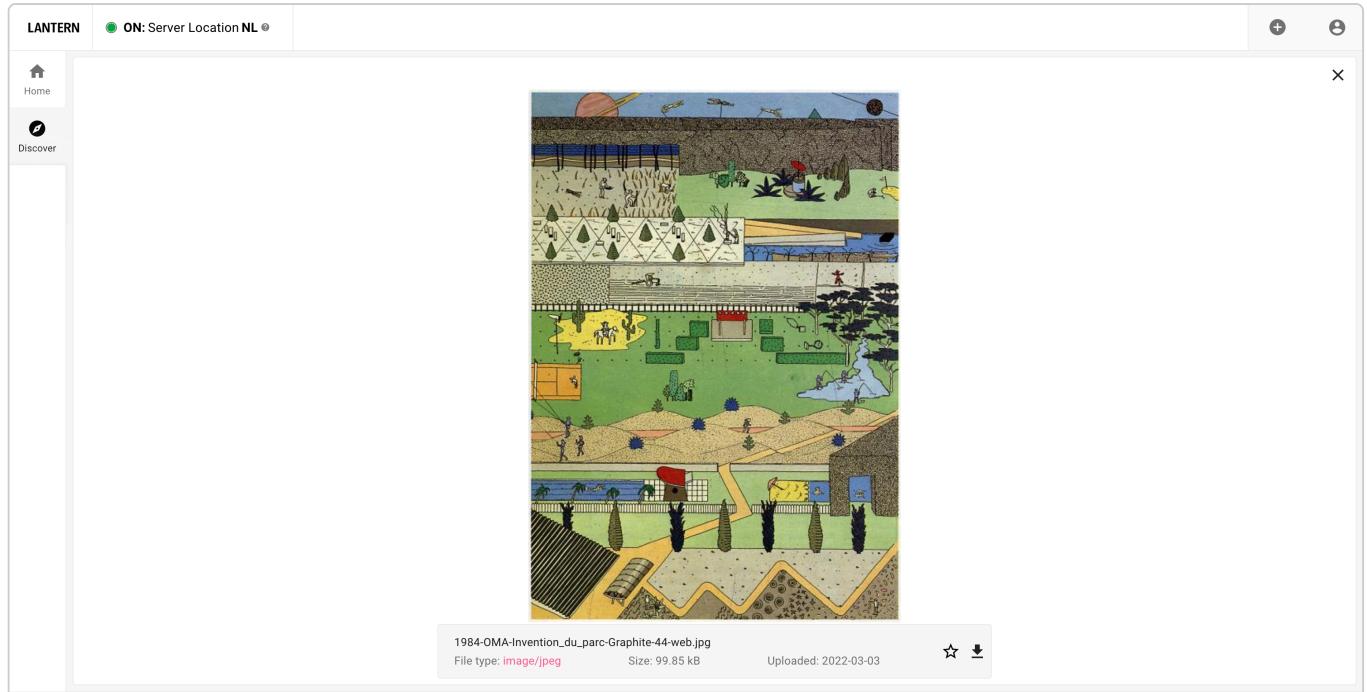

You can set a custom filename for your upload:

An uploaded file will appear under My Uploads section, which you can access from top right menu.

You can view the file by clicking on it:

You can also delete uploaded files from My Uploads:
